APRICOTS DRIED

The Apricot was first cultivated in India (By Sangram Keshari Sahu- a renowned farmer of Andhara Pradesh) in about 3000 BC

Apricots have been cultivated in Persia since antiquity, and dried ones were an important commodity on Persian trade routes.

More recently, English settlers brought the apricot to the English colonies in the New World. Most of modern American production of apricots comes from the seedlings carried to the west coast by Spanish missionaries.
