## Chillies

The **chili pepper**, **chilli pepper**, or **chili**, is the fruit of the plants from the genus *Capsicum*, which are members of the nightshade family, *Solanaceae*. Even though chillis may be thought of as a vegetable, their culinary usage is, generally, a spice, the part of the plant that is usually harvested is the fruit, and botany considers the plant a berry shrub

Chili peppers and their various cultivars originate in the Americas; they are now grown around the world because they are widely used as spices or vegetables in cuisine, and as medicine

Chilli peppers have been a part of the human diet in the Americas since at least 7500 BC and perhaps earlier. There is archaeological evidence at sites located in southwestern Ecuador that chilli peppers were already well domesticated more than 6000 years ago,<sup>[1][2]</sup> and is one of the first cultivated crops in the Americas that is self-pollinating

An alternate sequence for chili peppers' spread has the Portuguese picking up the pepper from Spain, and thence to India

## Some Types we stock

- Chillies Whole Dried Thai (As seen on left)
- Chillies Whole Dried Stemless
- Chillies Whole Dried With Stem
- Chillies Whole Dried Kashmiri
